Polycom® RealPresence® Group 700

Extreme video collaboration performance and flexibility for rooms where only the best will do

The Polycom® RealPresence® Group 700 solution is designed to be integrated into larger meeting rooms, training rooms, classrooms, and other workspaces that have more complex requirements. Such rooms demand additional flexibility in video, audio and content collaboration, and often need to be closely coupled with other room components for a fully integrated experience.

Polycom® RealPresence® Group 700 is a top of the line collaboration platform, with a high-performance architecture that meets your most demanding needs today and into the future. Simultaneous 1080p60 video and content sharing is ideal for applications that demand no compromises in clarity and experience.

Multiple camera, content and audio inputs and outputs gives you the flexibility to design a solution to meet any application requirements. For example:

- Connect multiple cameras to capture both the students and lecturer in a large classroom
- Have multiple content sources available to be shared at a moment's notice during an important executive briefing
- Use multiple microphones to cover every seat in a large training room, or add Polycom® SoundStructure® for more complex audio requirements
- Connect up to three monitors so everyone in the room can see clearly, even in very large spaces

Flexible camera options ensure all participants can see and be seen, no matter where they are sitting.

- Polycom® EagleEye™ Producer uses innovative facial-tracking algorithms to accurately frame all room participants, or focus on the person speaking—whichever you prefer, eliminating the “bowling alley” view that is all too common in video calls
- For a more immersive feel, Polycom® EagleEye™ Director offers the highest performance speaker tracking experience, transmitting facial expressions and body language for higher impact and more productive video collaboration
- The Polycom® EagleEye™ IV camera offers brilliant visual clarity, 12x zoom and an optional wide-angle lens adapter, capturing everyone clearly even in odd-shaped rooms

Optional built-in multipoint can host video calls with up to 8 participants in HD quality. For midsize organizations, this makes RealPresence® Group 700 a great fit at a main headquarters location or board room, hosting multipoint calls with other groups, plus mobile and desktop users.

For more details on the benefits of the RealPresence® Group 700, please see the RealPresence® Group Series family brochure.

Benefits

- Bring high-impact video collaboration into larger rooms and workspaces that have unique requirements
- Simple to use, with one-touch dial from the integrated calendar and the Skype for Business interface on the optional RealPresence Touch
- Deliver great experiences for every person in the room, ensuring that everyone is involved in all aspects of the conversation
- Flexible design, performance and camera options so you can build a solution for the specific application or use case rather than relying on a “one size fits all” approach
- High-performance architecture for the best in video, audio and content clarity now and into the future
- Integrate with Polycom® SoundStructure® for the ultimate audio experience in large meeting spaces
