

ScreenBeam 750 Wireless Display Receiver

Miracast™ Receiver for
Small-to-Medium Scale Deployments

A Miracast wireless display receiver that makes it easy for modern Windows and Android devices to connect to the room display for trouble-free content sharing.

ScreenBeam 750 modernizes classrooms, conference and meeting rooms with the latest Miracast wireless display technology. Wireless display gives teachers and presenters mobility to share content from anywhere in the room. Miracast support gets rid of apps and cables eliminating delays due to lost or mismatched cords. It comes complete with ScreenBeam Central Management System (CMS) software to support the remote management of ScreenBeam devices at scale, providing enterprise-class security and manageability that IT departments need.

The ScreenBeam 750 improves collaboration and increases productivity by enabling true mobility through cost-effective technology. Teachers and presenters freely roam the room while presenting from a mobile device, providing more opportunity to engage and collaborate with their students and audience in real time.
