We've got you covered!

TAILORED CLASSIC SUITS
STARTS FROM $199

Synchronization without hardware!

Omma orchestrator syncs displays without extra components such as PC players, video processors, and splitters. Whether harmonizing separate screens playing different videos or creating an impressive large video wall for a full screen takeover... let OMMA rule the show for you!

You already know how to use it!

Drag & drop items from your media library, place them on your content, add animations, and it's all done! No re-rendering, no agencies, no additional costs.

And you can change your content instantly! Even on videos!

Need an update on a video? With OMMA Smart Layers, you can now update any data on any video, and on your own. No time lost, no money spent.

An open platform to integrate them all!

OMMA's open and flexible architecture allows you to integrate everything. POS, public addressing, barcode, facial recognition, people counting, or any other 3rd party add on.
