

### Ergonomic storage

- Ergonomically designed for easy laptop storage and quick accessibility.

### Fully enclosed protection

- Heavy-duty chassis for ultra strong protection and years of continual use.
- Protective steel side panels to shield laptops.
- Prevents tampering and environmental damage such as dust, spilled fluids etc.

### Heavy-duty security

- Greater level of security through 3-point locking system and fewer leverage points.

### Advanced electrical safety

- Includes patented Eco System V3.0 with reverse EMF protection.
- Built in power supply for easy access to laptop power cords.
- Detachable power cord for easy replacement and compliance to OH&S requirements if damaged.

### Smart laptop charging

- Timer controlled charging reduces power consumption and carbon emissions.
- Prevents overheating and overcharging of laptop batteries.

### Effortless mobility

- Equipped with two large puncture proof cushion wheels to assist movement over rough surfaces and small rises.
- The compact and mobile design makes it easy to share one unit between multiple classrooms.
- Small foot print to conserve floor space.

### Eco-friendly finishing

- The entire range of Lock & Dock laptop trolleys are finished using eco-friendly powder coating which is lead free. Powder coating is the classroom safe finishing process with no dangerous fumes.
- All Gilkon laptop security cabinets and trolleys include a timer to preserve electricity and provide better value for the user over the life of the product. There are no lead solder joints in the timer system.

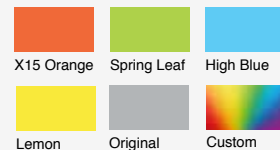

### Delivered fully assembled

- This is a security product and it is our belief that the assembly of these products is an important part of the quality process to ensure that the security objectives are achieved. To this end, all Gilkon security products are delivered fully assembled to ensure that the final product complies with the requirements.
- Includes safety brakes on castors.

### Choice of colours\*

- The entire range of Lock & Dock laptop trolleys and laptop cabinets are available in a range of Healthy Choice colours which utilise eco-friendly powder coating technology.

\*Coloured exterior includes door panels only.

**Store, transport and charge ultra portable laptop computers in one secure, locked cabinet.**  
Storage bays hold up to 30 ultra portable notebook computers.
