

# CAP *plus*<sup>+</sup>

## Overview

Experience stunning leading-edge visual performance with the CAP PLUS series of multi-touch systems with inbuilt Android..

All HDi multi touch screens have true multi-touch capabilities and work with Windows, OSX and Linux operating systems. The CAP PLUS series require no drivers when used with Windows 7, 8 & 10 — simply plug in to a compatible computer for immediate interactivity.

Native UHD (4K) resolution provides an ideal medium for presentation and/or collaborative interactive learning. There are ample I/O ports that would suit most audio visual environments, making the screen a must-have companion for education, government and the corporate sector.
