

AOTO Smart Pass Intelligent Temperature Detection and Personnel Access Management Solution

Fast and Easy approach to:

- Temperature Screening - contactless
- Personnel Access Management - Facial recognition, with or without mask. Hassle free – no need to remove mask for identity screenings
- Face-without-mask Detection
- Data Information Capturing and Storage

3 Simple Steps

01

Capture Face

Detection via face recognition technology

02

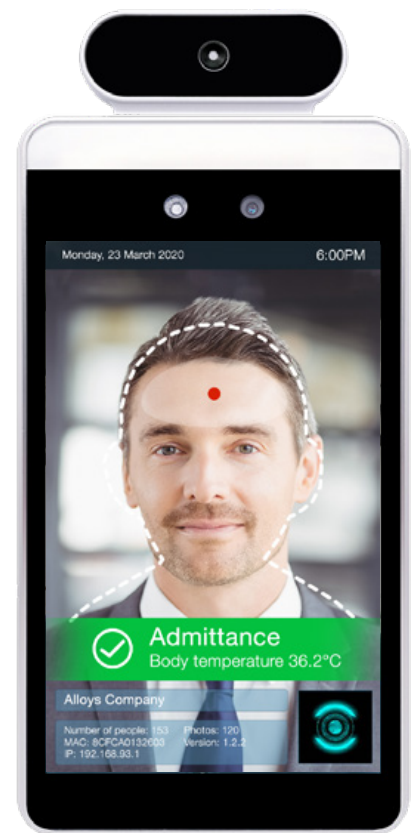

Position Face

If the face is not within the test area, the dotted line flashes. Adjust position till solid line appears.

03

Information Displayed

If the body temperature is normal, information will be displayed in white. Otherwise, information will be flashing in red with audio alarm. The same applies if mask detection is activated. Alert red flashings and audio alarm will be triggered if without-mask is detected.
